Letter to Students

Dear students,

Learning is an amazing journey that can take you places you've never been before. It's not just about getting good grades or passing exams, but about discovering your passions and exploring new ideas. Learning can be fun, exciting, and inspiring, and it can open doors you never even knew existed.

Here are some tips for mindful learning:

1. Find Your Passion: Start by exploring the subjects that interest you the most. What makes you curious? What do you enjoy doing in your free time? Once you find your passion, learning becomes effortless and enjoyable.

2. Make It Fun: Learning doesn't have to be boring or tedious. Find ways to make it fun and engaging. Use games, puzzles, and quizzes to test your knowledge. Watch educational videos or documentaries. Find interactive learning apps or websites that make learning more enjoyable.

3. Connect with Others: Learning is a social experience. Connect with other students, teachers, and mentors who share your interests. Join clubs, organizations, or online groups where you can discuss and share your ideas with others.

4. Stay Motivated: Learning can be challenging, and it's easy to lose motivation. Stay motivated by setting goals and tracking your progress. Celebrate your successes and learn from your mistakes. Stay positive, and don't give up.

5. Embrace New Challenges: Learning is about pushing yourself beyond your comfort zone. Embrace new challenges, take risks, and try new things. Don't be afraid to fail. Every mistake is an opportunity to learn and grow.

6. Make It Personal: Learning is not just about acquiring knowledge, but about personal growth and development. Make learning personal by setting your own goals, exploring your interests, and discovering your own unique strengths.

Remember, learning is a lifelong journey that can take you places you never even imagined. Embrace it, enjoy it, and let it inspire you to achieve your dreams.

With love and best wishes,
Ms. Ramiza Siddiqui

**Dear Students, Parents, Teachers,
and
Esteemed Readers,**

Assalam o Alaikum

It is with immense pleasure and pride that I extend my warmest greetings to each one of you as we present the latest edition of our school newsletter. This platform has become a cherished tradition in our school, showcasing the talent, creativity, and achievements of our wonderful students.

The pages of this magazine are a testament to the collective efforts of our dedicated students. As we flip through the vibrant and diverse sections, we witness the essence of our students' creativity captured in every article, artwork, and accomplishment.

This edition is particularly special, as it reflects not only the academic prowess of our students but also their resilience, creativity, and compassion. In the face of challenges, our students have risen above, showcasing their ability to adapt, learn, and grow. Their stories, achievements, and aspirations are woven into the fabric of these pages, creating a tapestry that

represents the unique spirit of our school.

I want to express my heartfelt gratitude to our talented team of editors, writers, photographers, and designers who have worked tirelessly to bring this magazine to life. Their dedication is evident in the quality and variety of content that fills these pages.

As we celebrate our students' achievements, let us also acknowledge the unwavering support of our parents and the tireless efforts of our teachers. It is the collaboration between home and school that nurtures the holistic development of our students, and for that, we are truly grateful.

I encourage each of you to take a moment to immerse yourselves in the stories within these pages.

Celebrate the successes, appreciate the creativity, and be inspired by the resilience of our students. Let this magazine serve as a reminder of the incredible potential that resides within each individual in our school community.

Thank you for your continued support, and I look forward to witnessing the continued growth and success of our students in the coming years.

With warm regards,
Umm-e-Kulsoom
Principal
Usman Public School System-32

Poetry

Farewell

In the tapestry of time, where memories softly bloom,
Our school days unfold, a symphony of room.
Guided by teachers, like beacons in the night,
Illuminating paths, with wisdom so bright.

Comrades in learning, a mosaic so grand,
Together we stood, an unbreakable band.
Laughter and struggles, etched in each day,
In the chapters of life, where we found our way.

Mentors, sculptors of minds, with passion ablaze,
Fueling our curiosity, in myriad ways.
Lessons not confined to the pages we turned,
But in the character, we built, as the fire burned.

Now we stand at the threshold,
Futures unknown, Destinies awaiting, seeds we have
sown.

In the tapestry of memories, forever vast,
A tribute to the present, to the future, to the past.

Farewell to these walls, where time gracefully weaves,
To friends and teachers, in our hearts, it cleaves.
The journey continues, as life's stories resume,
School days ending, in each other, we find our room.

Written by Haram Khalid (Class X)

Poetry

School Life

In the journey of school, where life started,
Where my old school fellows aparted.

Struggles were there through every door I opened,
Time passed much faster than it could've happened.

The journey to this school was tremendous,
The time spent with everyone was enormous.

Teachers showed light when I was in dark,
Friends gave love when people pointed mark.

The books that we studied,
Will surely never be buried.

Lastly, the time in this school hurried,
School days were ending, and I was getting worried.

Poetry

“I am Palestine”

The land of God's beloved
The sand ever blessed called by Him.
Hearts souls are grieving
But mind still believing.
The cries and screams in every street
In the pain of snapping each.
Increasing casualties day by day
Still resolving face-to-face.
Our bodies with towering faith
And the cause of ablazing wraith.
You with huge military groups
I, having one-man serenade.
Soon covering, by creator's divine help
Then world will see you in resigning yelp.

Written by: Syeda Ayesha Hussain (Class X)

Poetry

If You Ask Me

If you ask me,
I would say,
Palestine would be free one day.
The people are suffered,
They're killed, and murdered,
Who will stop this slaughter?
The dying of sons and daughters.

If you ask me,
I would say,
Palestine will be free one day.
If only they could eat,
And Jewish they could beat,
Palestine is a country,
Whose flag can't fly in its territory.

They're humans, not animals,
Or cows or sheep or camels,
If you ask me,
I would say,
Palestine will be free one day.

Written by Fatima Khan (Class VII B)

Poetry

Nature

In the heart of nature's embrace,
Where beauty and grace intertwine.

The trees whisper secrets of old,
Their branches reaching for the sky.

The sun brights the earth gently,
Painting the sky in hues of gold...
The flowers bloom in vibrant colours,
A symphony of nature's song...

The rivers flow with a gentle murmur,
Their water crystal clear and pure,
The mountains stand tall and proud,
Guardians of the land they endured.

So let us love this gift,
This language of the earth
And smile at the beauty around us,
for nature's love it is our rebirth.

Farewell

It was February 17th 2024, but not just an ordinary day for students of Classes IX and X. It was the day to bid farewell to the people I had grown so close to. It was an emotional morning, followed by bittersweet goodbyes and heartfelt memories by the end of the day. The air was thick with a sense of nostalgia as everyone was gathered to bid adieu to the first passing-out batch of Campus 32. Everyone had smile and joyous expressions on their faces. The event was started with the name of Almighty. Later, the venue was echoed up with claps of students and teachers, as the students of Class IX presented their marvelous performances in the form of role plays, drama and fun-filled skits. Particularly, the comedy skits performed by students were quite humorous and entertaining making everyone laugh and smile ear to ear. Another prominent feature of the program was the "Titles" presented to the students of class X. At the end, we enjoyed the lunch together, sharing and recalling our favorite moments of the day.

That brief event of "Farewell Party" will remain etched in our memories forever. Every little detail, every laugh, and every smile is ingrained in our minds. Looking back, we couldn't help but feel grateful for experiencing such a remarkable event. They were the kind of moments that made school life unforgettable. All in all, it was a bittersweet day, with heavy hearts and teary eyes. Nonetheless, we knew it was time to say our goodbyes and move on to new adventures, a journey that really never ends.

Importance of Education

Education is the most important thing in our life. It brings a great change in our lives. It is the foundation of human development. It is said that education is one of the basic rights of a person. Without education, there will be inequality and violence in the society. If everyone is educated, there will be peace and equality everywhere. Therefore, every person of society must get education. If I get a chance to help the poor children I will donate the books to them.

Written by Faiqa Amjad (Class VI - A)

Education for All

Education is very important for us, like if we can't study we can't do anything. Studies are very important for our future, it helps us in our future life. If we get a chance in future to choose a rule for our country so, I would decide that Education must be compulsory for all. Because we can't do anything without education. If everyone starts to get an education, the country will become developed. If we are well educated, we can do anything. So the lesson we get from this is that education is very important for all of us.

Education System of Pakistan

The main hope of a nation lies in the proper education of its youth. Unfortunately, the education of Pakistan is not very good. Pakistan has been facing critical problems regarding the education system and the government is not paying much attention to it. If we as Pakistanis want to progress then we must pay attention to our educational system. Japan is a prime example of gaining progress through education.

Insufficient attention to primary classes:

Many schools don't pay much attention to the primary level, not knowing that it makes the base of students.

Burden of studies for higher classes:

Most schools only teach students to get good grades in exams. As a result, students only focus on getting good grades rather than acquiring knowledge.

Barriers building institution:

Instead of uniting the nation, the education system of Pakistan is only building barriers due to different categories of education.

Ways to improve the educational system of Pakistan:

By adopting the following ways, we can improve our educational system:

- Same curriculum
- Up-to-date syllabus
- Skillful teachers
- Focus on primary level
- Lowering the fees
- Education without any discrimination

Final Words:

Education is the backbone of a country but unfortunately our country fails to understand.

However, it is our duty as citizens of Pakistan that if we wish to see our country successful, we should raise our voice for the future of our children. If we work together along with the government, then one day our country will certainly be among the most developed countries. **“Education is the most powerful weapon which you can use to change the world.”**

Written by Marium Munawar(Class VII A)

Child Labour

Child labour has been a big social issue because of the current economic situation in Pakistan. It convinces small children to do paid work like in households and small factories etc. It also affects children's mental and physical health as well as destroys the future of children. Some children are forced to be away from their right to education. A child is defined as a person who has not completed the age of 14 years. The solution for stopping child labour is only in the hands of the government. The government should use the necessary funds to educate poor children. It is also possible with the support of our society and the law enforcement agencies.

Israel – Palestine Conflict

The Israel-Palestinian conflict dates are back to the **Nineteenth century**. Israel occupied the remainder of historical Palestine, which included the Gaza Strip, the West Bank, East Jerusalem, and Syria. For a long time, the Israeli-Palestinian conflict has dominated regional and global headlines. The UN (United governments) and other governments are working to find a solution to the dispute. Hamas and other nations started ruling groups on operations for Al-Aqsa, while Israel regressed into several areas of Gaza. Over the 3000 to 5000 rockets are launched, and 1,000 Hamas fighters penetrate security barriers at various locations. There is an increasing number of Jews who are moving there to establish their own state. **It was founded in 1948, after World War-II**. In addition to the Jewish state.

The lingering issue would be settled when the Cold War ended. In the **1990s**, there was talk between Israel and the Palestine Liberation Organization, which resulted in the Palestine Authority. It seemed like the establishment of a Palestinian state was only a matter of time. The article tries to secure a final agreement between disputing parties. **Since October 7, 2023**, Israel and a militant group from Palestine have been battling in and around the Gaza Strip. Israel's onslaught against a populated Palestinian city halted.

O Allah, help and protect the people of Palestine, ease their pain and suffering.

O Allah best over of mercury better your mercy on them.

O Allah, make people's hearts helpful during this time of difficulty.

“Oh Allah, grant victory to the believers in Palestine!”.

All of you who wish to preserve your Muslim brothers and sisters should make DUA for them and abstain from purchasing Israeli goods, such as KFC, McDonald's, Lays, Pepsi, and so forth.

Support to Palestine

دیہاتی زندگی شہری زندگی سے بہتر ہے

زندگی میں انسان کو رہنے کی جگہ اور وسائل کی ضرورت ہوتی ہے۔ شہر، گاؤں، دیہات جہاں جہاں فائدہ اور ضروریاتی وسائل موجود ہیں وہاں کہیں سہولتیں زندگی کے اثرات موجود ہیں۔ آج کل سب سے گنجان رہنے کی جگہ شہر ہے۔ شہری زندگی کو لوگ صنعتی زندگی بھی کہتے ہیں۔ کیوں کہ یہاں پر مختلف چیزیں کارخانوں میں بنتی ہیں اور اکثر چیزیں ٹیکنالوجی کے ذریعے بنتی ہیں۔ شہر میں تمام ضروریات زندگی موجود ہوتی ہیں۔ یہاں پڑھنے لکھنے کے لیے اسکول، کالج اور یونیورسٹی وغیرہ موجود ہیں۔ ملازمتیں بہترین ہوتی ہیں، رہنے کے لیے مکان یعنی خوب صورت گھر موجود ہوتے ہیں۔ لیکن اگر دوسری طرف دیکھیں تو اس کے نقصان بھی بہت ہیں۔ کیوں کہ شہر میں سمعی آلودگی جو کہ گاڑیوں، موٹر سائیکل وغیرہ کے شور اور ہارن سے پھیلتی ہے اور دھوئیں سے ماحولیاتی آلودگی پھیلتی ہے۔ اسی لیے شہر کی آب و ہوا دیہات سے کئی گنا زیادہ ہوتی ہے۔ جب کہ دیہات کی آب و ہوا شفاف ہوتی ہے اور ہر جگہ ہریالی ہی ہریالی ہوتی ہے جو کہ وہاں کے لوگوں کو صحت مند رکھتی ہے۔ دیہات میں کھانے پینے کی چیزیں تازہ ہوتی ہیں دیہاتی زندگی کے بھی چند نقصانات ہوتے ہیں مثلاً یہاں صنعتی وسائل کی کمی کا ہونا، تعلیم کا فقدان ہوتا ہے جس کی وجہ سے زیادہ تر طبقہ کھیتی باڑی سے تعلق رکھتا ہے۔ جس کی بنا پر دیہات میں ترقی کی راہیں کم ہوتی ہیں اور لوگ شہر کی طرف منتقل ہوتے ہیں دیکھا جائے تو شہری اور دیہاتی دونوں کے طرز زندگی فوائد اور نقصانات ہیں۔ پس اس کا انحصار وہاں کے لوگوں پر ہوتا ہے کہ وہاں موجود ذرائع کو کس طرح استعمال کیا جائے۔ اور کس طرح مثبت انداز میں زندگی گزاری جائے۔

فصل فیصل (جماعت ہشتم)

روزگار فراہم کروں جس سے بے روزگاری ختم ہو۔ میں بس اسی خیال میں گم تھی کی امی نے مجھے آواز دی اور میں اپنے خیالوں کی دنیا سے واپس آگئی اور آخر میں بس پاکستان کے لیے دُعا گو ہوں کہ میرا ملک ہمیشہ شاد و آباد رہے اور ترقی کی راہ پر گامزن رہے اور اللہ میرے ملک کو اپنی حفظ و امان میں رکھے (آمین)

مسفرہ ندیم (جماعت ہفتم)

لیپ ٹاپ کی ایجاد

انسان کو ہمیشہ سے حساب کتاب کرنے کے لیے ایک ایسی مشین چاہیے تھی یا ایسی چیز کی ضرورت تھی جس سے وہ درست حساب کتاب کر سکیں۔ کمپیوٹر کے بانی چارلس بیبج تھے جنہوں نے پہلا کمپیوٹر ایجاد کیا تھا۔ کمپیوٹر سے پہلے ایباکس ایجاد ہوا تھا لیکن اس پر حساب کتاب کرنے کے لیے انسان کا اس مشین کے آگے موجود ہونا ضروری تھا لیکن وہ چاہتے تھے کہ ایک ایسی حساب کتاب کرنے والی مشین بنائی جائے جو انسان کی غیر موجودگی میں بھی کام کرے۔ ۱۸۲۲ میں پہلا کمپیوٹر ایجاد ہوا۔ مائیکروچپ کی ایجاد کے بعد کمپیوٹر مختصر ہو کر لیپ ٹاپ کی شکل میں بھی ایجاد ہوا۔

لیپ ٹاپ سے ہمیں بہت سی معلومات ملتی ہیں اور آسانی سے ہر چیز کے بارے میں معلومات حاصل کی جاسکتی ہیں۔ لیپ ٹاپ کے ذریعے ہمیں دنیا بھر کی خبریں پتہ چل سکتی ہیں کہ دنیا کے کس کس کو نے میں کیا حالات چل رہے ہیں۔ ہم اس میں مختلف طریقے کے حساب کر سکتے ہیں اور نت نئے گیم کھیل سکتے ہیں، مختلف ویڈیوز دیکھ سکتے ہیں، کہانیاں سن سکتے ہیں اور کتابیں سکتے ہیں۔ جہاں اس کے اتنے فائدے ہمیں نظر آتے ہیں وہیں اس کے چند نقصانات بھی ہیں جیسے کہ اس کے ذریعے سے ملنے والی ہر معلومات صحیح نہیں ہوتی۔ لیپ ٹاپ سے نکلنے والی مضر شعاعیں جہاں ہماری آنکھوں پر اثر انداز ہوتی ہیں وہیں یہ لیپ ٹاپ ہمارے قیمتی وقت کو ضائع کرنے کا باعث بنتا ہے۔

سائنسدانوں نے مائیکروچپ کو اور چھوٹا کرنے کے لیے تحقیق شروع کر دی ہے۔ ان کے مطابق ایک اسی چپ ایجاد کی جائے جس سے مزید جلدی کام ہو۔ کچھ سائنسدانوں کے مطابق اس مائیکروچپ کو ڈی-این-اے سے بنایا جائے کیونکہ ڈی-این-اے کے ایک حصے میں لاکھوں، کروڑوں معلومات جمع کر سکتے ہیں۔ اب بھی اس مشین کو مزید بہتر بنانے کی تحقیقات جاری ہیں۔

علیزہ حماد (جماعت ششم)
